Newborn Session Packages – \$300.00

Newborn photos should ideally be taken in the first 10-14 days of your baby's life. I can come to your house, with all the backdrops and equipment needed. If you have any special outfits or props that you would like to use, I welcome that. I also have an assortment of items to choose from. We can also include some lifestyle photography, where we take pictures of the entire family in your house. Ideally, newborn sessions should be booked before you give birth. It is best to get the session on my calendar, so that I know you would like them done within 10-14 days after birth.
